

NATURAL CHARCOAL

About our charcoal

This Big Green Egg All-Natural Charcoal is made from FSC-certified beech and hornbeam hardwoods sourced from sustainably-managed forests.

This combination of select hardwoods is an efficient fuel source with long burning times - providing more value in every bag, and featuring a mild, aromatic flavor enjoyed by top chefs and grillers around the world!

Want to give an extra touch to the taste of your dishes? Add some Big Green Egg wood chips or chunks to your charcoal and Enjoy!

NOTE: the 9 kg bags contain extra-large pieces for longer burning times. The pieces of charcoal in the 4,5 kg bag are not as big and therefore perfect in combination with the smaller EGG models.

Premium Quality.
